## Limit Controller

1/32 DIN - 48 x 24 mm

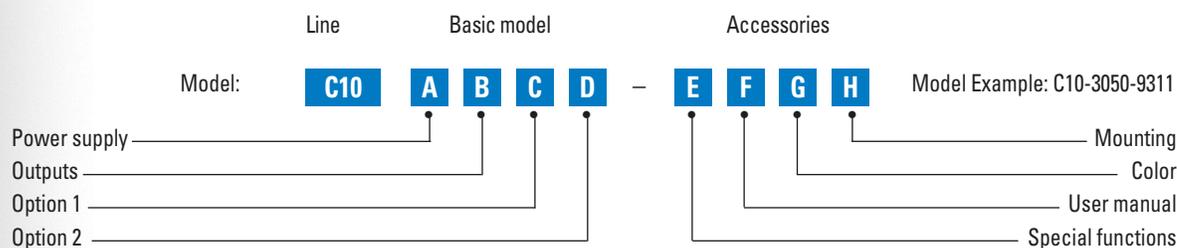

Platinum™ series C10 line

### Safety and Reliability in a Small Package

The C10 Platinum Limit Controller is a micro-processor based controller used to safely limit temperatures in thermal applications where a runaway condition may compromise operator safety, equipment, or product. The C10 Limit Controller provides this protection cost effectively and with minimum panel space while providing standard features of IP65 front panel protection and Factory Mutual (FM) approval. Options include communications, DIN rail-mounting, and two front panel colors.
